Webinar: Survival Mode Quality - *Quality and Innovation Tools and ISO Standards for Survival in a Pandemic*

30th April 2022 (Saturday) from 10:30am to 11:30am

Introduction	Since the outbreak of Covid-19 that lasts for 2+ years, many businesses are struggling for survival. During this period, many cities have been locked down producing adverse effects on manufacturing and logistic operations as well as significantly altering service delivery. This webinar tries to combine different quality management and innovation tools (Lean & Extencis), as well as ISO standards (ISO 9001, ISO 22301 & ISO 22316) for achieving the survival mode of businesses.
