Webinar:

The Chinese Intelligent Manufacturing Capability Maturity Model and Its Assessment Method

28th May 2022 (Saturday) from 10:30am to 11:30am

Introduction	<p>Intelligent manufacturing is an approach that integrates intelligent decision making, processes, operations and resources based on emerging information technologies to enhance organizational performance and technical capabilities. Intelligent Manufacturing Capability covers the extent to which an enterprise carries out management improvement and comprehensive application with regard to personnel, technology, resource, manufacturing, etc. in order to realize the goal of intelligent manufacturing.</p> <p>This webinar aims to introduce the GB standards of intelligent manufacturing capability (GB/T 39116:2020 and GB/T39117:2020).</p>
Speaker	<p>Dr. Lotto Lai Chairman of HKSQ Adjunct Professor, ADSE Dept., CityU Academician of International Academy for Quality (IAQ)</p>
