

Seminar/Webinar on: Medical Device Cybersecurity: Lessons from Real Incidents and Introduction to IEC 81001-5-1 Security Requirements

10 April 2026 from 7pm to 8pm

Introduction	<p>Healthcare is becoming smarter, more connected, and more dependent on software than ever before. But when medical devices and healthcare systems are connected, cybersecurity is no longer just an IT issue — it becomes a matter of safety, trust, and continuity of care.</p> <p>In recent years, real-world cyber incidents have shown how attacks on healthcare systems can disrupt services, expose sensitive data, and create risks far beyond the digital world. As connected medical technologies continue to grow, one question becomes increasingly important: how do we build security into healthcare from the start?</p> <p>This seminar will share lessons from real incidents and provide an introduction to IEC 81001-5-1, highlighting why cybersecurity is becoming an essential part of modern medical device quality, safety, and trust.</p>	
Speaker	<p>Dr. Norton H. Y. Yuen PhD HKMU, MSc HKU, BEng HKPU Managing Director, The One Testing Technology Company Limited CEO, ECTest Company Limited (Hong Kong)</p> <p>Dr. Norton Yuen has over 20 years of experience in testing, certification, and laboratory operations. He is currently leading the cybersecurity laboratory development of The One Testing Technology Company Limited and also serves as CEO of ECTest Company Limited in Hong Kong. He has served as an ISO/IEC 17025 Technical Assessor for HKAS in EMC and RF, and is currently a candidate Technical Assessor for TAF in cybersecurity. He also holds CEH, CEH Practical, and CEH Master certifications. His expertise includes laboratory accreditation, cybersecurity testing, wireless certification, reliability engineering, and testing automation.</p>	
Venue:	PQ703 of the Hong Kong Polytechnic University	
Fee:	Free of charge, priority for organizing bodies members and supporting organizations	
Max number of participants:	30 for onsite 100 for online (Zoom)	
Language:	Chinese (Cantonese) (Some with English Terminology)
